How to in Details

1. **How to install/update the script?**

   Answer: To install/update seller subscription system you need to follow the below steps :

   - **Active eCommerce cms** should be **pre-installed** on your server.
   - **Purchase** and **Download** the **Seller Subscription System Addon file**.
   - **Login** in to your admin panel of **Active eCommerce cms** the system
   - Go to **Addon Manager**
   - Click on **Install New Addon**

- Choose the **downloaded zipped file** and click on **Install**.
- After Installation, you will find the **Seller > Seller Packages Menu in your left sidebar** of sellers tab on the admin panel.
- Now you need to **create your custom seller packages for sellers** to use this Addon.

2. **Which features are included in the Seller Subscription System Addon?**

Answer: Below features are included in the Seller Subscription System:
- Unlimited seller package create, edit, delete.
- Seller physical product upload limit with package icon, name, price, duration
- Seller digital product upload limit with package icon, name, price, duration
- Auto unpublish seller product after package duration expire by cron job

3. **How to configure Seller Packages?**

Answer:
- Login to admin panel
- Go to Seller > Seller package from admin panel menu
- Click Add new package from right right corner
- Fill the form with package name, package price, physical product upload limit, digital product upload limit, package duration, package icon & click save to add a new package
- Sellers will find an option in their panel to upgrade/purchase their package.

4. **How to configure Cron Job to unpublish the expired sellers products?**

Answer: There is an option with this add-on to unpublish the expired seller products. To check the validity of their package. You need to set up a cron job on your server.
To set a cron job login to your cpanel and find the **Cron Jobs** option.

- Go to Cron Jobs
- Add new Cron Job
- Select time period of **Every Day**
- Set command as **wget -O -**
  http://example.com/seller_packages/check_for_invalid

● Your domain name on **example.com**
